

Six of Rods

Traditional meaning:

This is a card both about achievement and about congratulations. You have made it through some hurdles and have achieved some successes. It's good to pay attention to those and to listen to your supporters. Sure, there might be more ahead, but that's OK. One step at a time.

My Interpretation:

She seems serene, content, holding her wreath of peace high. She's riding, but at an odd angle, so probably going uphill with her horse. There are other rods around her, almost as an audience. So things are going well. She is where she wants to be. There is time for a pause and reflection.
